

14 April 2008

To Whom It May Concern:

We, The Leeds Partnerships NHS Foundation Trust have for the last 2 years been using **Fleetmasters of 18 Kingsley Drive, Townville, Castleford, WF10 3PS** for our Driver Risk Assessments and Training for Trust employees.

We introduced this after increases in driver incidents and insurance claims. After 12 months we noticed a significant reduction in incident/insurance forms being submitted and an improvement in driving standards. This also has contributed to reduced individual vehicle insurance premiums, leading on to the equivalent cost saving of approximately £450 per driver per year.

As well as the obvious cost savings to the Trust, I would highly recommend Fleetmasters because of their professionalism and approachable nature when dealing with my staff (some of whom were very apprehensive leading up to their assessment).

For me personally the biggest advantage of using Fleetmasters was their flexibility over other companies I contacted. Most of the assessments were carried out during my drivers normal working duties, thereby having no impact on my logistical operations.

As a NHS Foundation Trust we will continue to use Fleetmasters for all our continued risk assessment/training of our drivers.

Yours faithfully,

**Paul Flint**  
**Transport Manager**
